Use form SS-PER-015-01(B) to propose product usage (e.g., inks, solvents, solutions) through the printing presses.

***Attach a copy of the manufacturer's specification sheet(s) for each printer.***

# Form Instructions

Before filling out this worksheet, locate the **Supplemental Information** box at the top right.

- If submitting this worksheet with a permit application, leave the box blank.
  - If submitting this worksheet without a permit application, or in response to a DAQ request for supplemental/requested information, check the box.
1. Provide the source name as it appears on the application. If a permit already exists for this operation, the source name should match the name on the permit.
  2. If the source is existing and already has a permit, provide the Source ID number as it appears on the permit. Otherwise, enter "New."
  3. Provide a brief description of the proposed project as it appears on the permit application. Indicate whether the equipment is being proposed as a new emission unit, replacing an existing emission unit, or being modified. If it is being modified, briefly describe the proposed changes.

## **USE ATTACHMENT IF ADDITIONAL SPACE IS REQUIRED.**

4. Indicate the type of printing press(es) being proposed to operate by this source. Add separate worksheets if proposing more than one type of printing press.
5. Indicate the type of printing method used by the proposed printing press(es) checked in Question 4.
6. Provide the specifications of the proposed printing equipment used by this source. Up to 4 presses can be listed on this form. Use additional sheets as needed to describe all the presses to be operated at the source.
