INDUSTRY NOTICE

DATE: May 2, 2011
TO: Industry
FROM: Kevin T. McOsker, P.E., C.B.O.
Manager – Building Inspections
SUBJECT: Low Voltage Plan Requirements

Effective July 5, 2011, the Department of Development Services will require plans for every low voltage electrical permit application.

In cases where a new project is under valid construction permits, the electrical system is designed by a Registered Design Professional; and the approved electrical plans for the building includes the low voltage system(s), new plans are not required to be submitted. Supplemental permit(s) may be issued from the original design documents. The installation shall comply with the approved engineered plans. If the approved engineered plans do not include the low voltage system(s) being permitted, new plans shall be required.

As a reminder, permits may be issued to any contractor utilizing engineered plans. However, permits utilizing contractor drawn plans may only be used by the same contractor who prepared the drawings.

Please contact Dennis Hunt at (702) 455-8079, if you have any questions or require further information.
