30.44 Uses.

30.44.005 General. Unless otherwise specified in Table 30.44-1, all uses must be conducted within a permanent enclosed building.

30.44.010 Uses Allowed in Zoning Districts

- a. The uses listed in Table 30.44-1 are subject to the development standards listed in Chapters 30.52 (Off-Site Development Requirements), 30.56 (Site Development Standards), 30.60 (Parking and Loading Regulations), 30.64 (Site Landscape and Screening Standards), and 30.68 (Site Environmental Standards) unless modified by the restrictions of any of the overlay districts in Chapter 30.48 (Zoning Overlay Districts) or by the table.
- b. The following categories of uses, conditions and exceptions are identified and listed in Table 30.44-1:
 1. **Permitted Uses "P"**. The use is permitted as a principal use in that zoning district.
 2. **Accessory Uses "A"**. The use is permitted only as an accessory use to the principal use, indicated in Table 30.44-1, within the specified district, but this does not exclude other land uses which are also considered accessory to the principal use, but not listed in Global Use Table. Within the Co-operative Management Agreement Area (See Map in G), accessory structures and uses shall be permitted on a lot deed restricted by Clark County for nonresidential uses only; where the principal use is established on the adjacent lot and both properties are under the same ownership. The Zoning Administrator shall determine when uses are accessory.
 3. **Conditional Uses "C"**. The use is permitted in the specified districts subject to meeting stated conditions (this may be reviewed with a building permit, business license or design review; a separate land use application is not required). If stated conditions do not apply, the use is a permitted use in that district. All conditional uses require performance measures to mitigate possible negative impacts of the use. These measures are numbered where each conditional use is listed in the Table 30.44-1.
 4. **Temporary Uses "T"**. Temporary uses are permitted in each zoning district subject to the performance conditions listed with an administrative temporary use (T), as provided in Table 30.16-5.

5. **Special Uses "S"**. The use is permitted as a special use in the listed districts with a special use permit subject to a public hearing process per Table 30.16-4. Some special uses require performance measures to mitigate possible negative impacts of the use when each special use is listed in table 30.44-1.
6. **Conditions related to various uses**. Most uses require performance conditions to mitigate possible negative impacts of the use. Whenever the applicant cannot or does not desire to comply with a performance condition, relief may only be sought as follows:
 - A. **Accessory Uses, Conditional Uses, Temporary Uses** - a special use permit may be requested in order to waive a condition associated with these uses, unless the condition cannot be waived or varied.
 - B. **Special Uses** - a waiver of development standards may be requested in addition to the special use permit, in order to waive a condition associated with a special use, unless the condition cannot be waived or varied. Certain conditions, as listed in Table 30.44-1, may be considered to be waived during the public hearing process of the special use permit, without the separate waiver of development standards application.

Examples are shown below.

EXPLANATION: If the property is zoned C-2 and one wants to conduct outdoor uses, the Commission or Board may place conditions on the outdoor use as part of the special use permit request.

7. Prohibited Uses.

- A. Uses not permitted are expressly prohibited; however, nothing in this Title shall be construed to prohibit constitutionally protected activities including the use of a home for noncommercial gatherings of family and friends, discussion groups, religious or political gatherings, or neighborhood meetings.
- B. If one (1) of the above letters indicating the category of use is not shown in the zoning district columns in Table 30.44-1 for a corresponding use, then the use is not permitted.
- C. Transient commercial use of residential development for remuneration is prohibited in, except as otherwise expressly permitted.
 - i. The provisions of this Section do not supersede private covenants, deed restrictions, declarations of restrictions and equitable servitudes which impose conditions more restrictive than those imposed by this Section, or which impose restrictions not covered or addressed by this Section.
 - ii. The right to maintain a legal nonconforming transient commercial use of residential development for remuneration (profit) shall terminate within three (3) years from August 19, 1998, after the use became legally nonconforming, subject to the following provisions:
 - a. Such a use shall not be classified as a legal nonconforming use, and shall thereafter conform to the regulations specified in this Section, if the use is maintained, or has been maintained, in violation of, or contrary to, private covenants, deed

restrictions, declarations of restrictions, equitable servitudes, or the express terms of a deed of trust, loan or other purchase agreement or security instrument applicable to the residential developed property upon which the use is maintained.

- b. If any such legal nonconforming use ceases for any reason for a period of thirty (30) days or more, any subsequent use shall no longer be classified as a legal nonconforming use and shall thereafter conform to the regulations specified in this Section.
- c. Nonconforming uses and structures established pursuant to this Section are subject to the regulations concerning nonconforming uses and structures set forth in Chapter 30.76 (Nonconformities) of this Title for the period specified in subsection (7) (c) (ii) above.
- d. The Standard Land Use Classification Manual (SLUCM) categories as shown in Table 30.44-1 shall be used to determine compatibility of uses within Table 30.48-AE. For a more detailed list of SLUCM categories, see Appendix E.
- e. The uses found in Table 30.44-1 are also categorized by zoning district in Appendix F. Where there is a conflict, Table 30.44-1 shall prevail. (Ord. 2573 § 9, 2001)

30.44.020 Alternative Standards for Specific Site Development Standards Required With Specific Uses. It is recognized that individual sites may present unique characteristics, the operation and location of site uses that could be best developed through the application of alternative site development standards which depart from the requirements of this Chapter. In certain circumstances such alternative standards may be considered beneficial by the Commission or Board as a tool to achieve the land development policies of the County. In such cases, the Board or Commission may approve alternative site development standards through the granting of a waiver of standards, according to the procedures outlined in Table 30-16-7 of this Title subject to finding that the alternative standards will:

1. Result in a development which is as or more compatible with adjacent development than anticipated by the requirements of this Chapter.
2. Encourage a development trend similar to that anticipated by the requirements of this Chapter.
3. Result in a development which meets or exceeds all other requirements of this Title.
4. Encourage the use of appropriate energy efficient design guidelines as specified in Section 30.56.085

All communication towers and antennas shall comply with the conditions below. Use is permitted outside.</p> <ol style="list-style-type: none"> The frequencies used by the communication provider shall be in conformance with Federal Communication Commission standards as certified by a competent professional. The proposed tower is required because the antenna is not able to be located on an existing building, tower, <u>structure, sign, or approved tower</u> within the communications grid established, or to be established, by the communication provider because of one of the following: <ol style="list-style-type: none"> The unwillingness of the owner of an existing tower or building to agree to collocation or to provide adequate space on the property for the equipment necessary to support additional communication antenna(s). The lack of structural capacity for the antenna on the existing tower or building. The new antenna would interfere with existing or other planned equipment on the existing tower or building. The available heights on the existing tower or building are not compatible with the proposed communication grid. Other unforeseen reasons which make it commercially impracticable or technically unfeasible to locate on an existing tower or building. <u>Notwithstanding subsections (A) through (E) above, all communication providers shall first attempt to locate antenna arrays upon existing buildings and structures, including off-premises signs, within 600 feet of the proposed site prior to being approved for a new tower installation. In the event that there is such a building or structure within the distance of 600 feet, it will be incumbent upon the communication provider to demonstrate either technological or economic hardship which would discourage this cooperative land use.</u> Standards listed as applicable to towers or antennas may not be required if such standards prevent the communication provider from establishing a communication system as required by federal law. One radio transmission and receiving mast tower is permitted as an accessory use to a single family residence which is occupied by a Federal Communication Commission licensed amateur radio operator with the following conditions: <ol style="list-style-type: none"> The overall height does not exceed sixty feet unless further restricted by the Airport Airspace Overlay; The structure shall not be less than fifteen feet from any side or rear property line; The tower shall be designed and operated so as to comply with the regulations promulgated by the FCC. <u>The tower must be removed when no longer in use.
