30.68.070	Hazardous Material.
30.68.080	Adjustments to Site Environmental Standards.

30.68 Site Environmental Standards

30.68.010 Purpose. The purpose of this Chapter is to protect adjacent uses and the community against objectionable noise, light, smoke, particulate matter, odors, and hazardous materials generated on property by uses conducted on the property.

30.68.020 Noise.

- a. Excessive noise shall be muffled to mitigate objectionable intermittence, beat frequency, shrillness or volume.
- b. The maximum permissible sound pressure level of any continuous, regular, or frequency source of sound produced by any activity shall be established by time period and type of zoning district per Table 30.68-1.
- c. Public address systems of any kind shall only be permitted subject to special use permit approval unless in conjunction with live entertainment or a temporary outdoor commercial event which is otherwise approved.
- d. Sound levels shall be measured with a sound level meter and associated octave band filter, manufactured according to standards prescribed by the American National Standards Institute, ANSI S1.2-1962 "American Standard Meter for the Physical Measurement of Sound" and the revisions thereof, including ANSI S1.1-1976, ANSI S1.6-1984, ANSI S1.4-1983- Type 1 Precision, ANSI S1.11-1986 and ANSI S1.13 Field Method. Measurements shall be made using the flat network of the sound level meter.
- e. Impulsive type noises shall be subject to the standards described in Table 30.68-2, provided they are capable of being accurately measured with the equipment described above.
- f. For the purpose of this Chapter, noises capable of being measured shall be those which cause rapid fluctuations of the sound level meter needle with a variation of no more than plus or minus two (2) decibels. Noises incapable of being measured, such as irregular and intermittent sound emissions, shall be controlled so as not to become a nuisance to adjacent uses.
- g. Sound pressure levels shall be measured at all property lines at a height of at least four (4) feet above the ground surface.
 1. Where the emitting and receiving premises are in different zoning districts, the limits governing the more restrictive district shall apply to any regulated noise entering that district.
 2. The levels specified may be exceeded by ten decibels (10dB) for a single period not to exceed fifteen (15) minutes in any one day.
- h. Requirements of this Section do not apply to:
 1. Construction and/or demolition activities when conducted during daytime hours.
 2. Sound generating equipment or apparatus used for public safety or to warn the public of an emergency.
 3. Noise from use-related loading/unloading operations that affect residential areas when conducted during daytime hours.

4. Lawn maintenance and home repair only if conducted during daytime hours as a normal function of any authorized use, and the equipment is maintained in proper working condition.
5. Aircraft Noise.
6. The H-1 district within 500 feet of Las Vegas Boulevard South.
(Ord. 2907 § 11 (part), 7/2003)

- 30.68.030 Lighting.** All on-site lighting of buildings, lawns, recreation areas, and parking areas shall be designed to prevent light from shining directly onto residential uses. All light sources shall be shielded and directed downward at all times to prevent adverse impacts to adjacent residential uses or zoning districts. (Ord. 2907 § 11 (part), 7/2003)
- 30.68.040 Vibration.** Vibration shall not be discernable to the human senses at any property line at any time. (Ord. 2907 § 11 (part), 7/2003)
- 30.68.050 Odors.** Odor is regulated by the *Clark County Air Quality Regulations* as follows: Section 12, Pre-Construction Review for New and Modified Sources; Section 16, Operating Permits; and Section 43, Odors in the Ambient Air. The Control Officer of the Clark County Department of Air Quality and Environmental Management retains all authority with respect to interpretation, regulation and control of odor. (Ord. 3085 § 57, 6/2004; Ord. 2907 § 11 (part), 7/2003)

- 30.68.060 Smoke and Particulate Matter.** Smoke and particulate matter is regulated by the *Clark County Air Quality Regulations* as follows: Section 12, Pre-Construction Review for New and Modified Sources; Section 16, Operating Permits; Section 26, Emission of Visible Air Contaminants; Section 27, Particulate Matter from Process Weight Rate; Section 28, Fuel Burning Equipment; Section 30, Incinerators; Section 35, Diesel Powered Electrical Generating Equipment; Section 90, Fugitive Dust from Open Areas and Vacant Land; Section 91, Fugitive Dust from Unpaved Roads, Unpaved Alleys, and Unpaved Easement Roads; Section 92, Fugitive Dust from Unpaved Parking Lots, Material Handling and Storage Yards, Vehicle and Equipment Storage Yards; Section 93, Fugitive Dust from Paved Roads and Street Sweeping Equipment; and Section 94, Permitting and Dust Control for Construction Activities. The Control Officer of the Clark County Department of Air Quality and Environmental Management retains all authority with respect to interpretation, regulation, and control of smoke and particulate matter. (Ord. 3085 § 58, 6/2004; Ord. 2907 § 11 (part), 7/2003)
- 30.68.070 Hazardous Material.** Hazardous materials, including chemicals and explosives, shall be regulated by the Clark County Fire Code, adopted Building Codes, and by the Nevada Revised Statutes and/or the Nevada Administrative Code. A special use permit is required for hazardous materials storage (See 30.08 and Tables 30.16-4 & 30.44-1). (Ord. 3085 § 59, 6/2004; Ord. 2907 § 11 (part), 7/2003)
- 30.68.080 Adjustments to Site Environmental Standards.** Proposals to utilize standards different from those provided elsewhere in this chapter may be considered in light of the unique characteristics of an individual site, including those created by the shape and location of property, design of existing or proposed structures, and the operation of proposed uses at the site. Adjustments to site environmental standards include those related to noise and lighting. The determination of the acceptability of such adjustments shall be based upon consideration of the following:
1. The ability of the proposed adjustments to result in the same or improved site environmental functions required by the standards of this Chapter.
 2. The ability of the proposed adjustments to provide the same or enhanced visual character to the site that would result from the application of the required site environmental standards for which alternatives are being offered.
 3. The ability of the proposed adjustments to result in site environmental standards that maintain or increase compatibility with adjacent sites as anticipated through the application of the required site environmental standards for which alternatives are being offered. (Ord. 2907 § 11 (part), 7/2003)
