Deaths	0	0	12	9	4	17	3	-79.8%
Injuries	3	5	45	74	62	48	45	-7.1%

Notes & Highlights

Summary excludes airport and volunteer stations.

Incidents measure separate events. Responses measure the number of units that respond to each incident.

¹Response time measures from call pickup to first arriving unit on scene to all emergency incidents. CCFD response time goal is 7 minutes to 90% percent of the incidents.

²Other category includes responses and incidents such as smoke investigations, extrications, fuel spills, etc.

⁴Peak units are deployed during expected high-call volume days and times on an 8 hour shift. These units were implemented on January 13, 2012.
