

Based upon the input from stakeholders at the meeting held on August 25, 2026, the following changes were made:

1. Section 16.16.020, Lane Occupancy Charge, was modified. The \$100 charge, per day, per lane that reduces the lane through a signalized intersection was replaced with the current City of Henderson right-of-way occupancy charge. Calculation of the fees for a right-of-way occupancy charge shall commence on the first day following the effective date of the barricade permit fee for the lane closure for a roadway special event. The fee shall be \$50 per day for each lane that is closed at any time of the day.
2. Changed definition of a “lane” to exclude bike lanes, and include right and left turn lanes.
