RE: DESERT CONSERVATION PROGAM PROJECT COMPLETION NOTIFICATION:

VIRGIN RIVER DRONE IMAGERY 2017-SWCA-1750A

The work for the above referenced project has been completed. Please see the attached for all project related information.

The purpose of the above referenced project was:

The purpose of this project is to document baseline conditions by collecting highresolution imagery via drone to evaluate the effectiveness of restoration implementation.

The major accomplishment or findings of this project include:

The major accomplishment was the collection of high resolution imagery prior to restoration treatment. Orthomosaics were processed and analyzed. A relief model was produced to identify higher and lower portions of the terrain. An analysis of the orthomosaics was also conducted showing areas of vegetation cover versus areas of bare ground.

For more information about this project and/or for other Project Reports or Symposium Reports, please visit our website at: http://www.clarkcountynv.gov/airguality/dcp/Pages/default.aspx

If you have any questions, please contact Caryn Wright at (702) 455-2972.

Sincerely,

Marci D. Henson Director, Air Quality Administrator, MSHCP
