Instructions

IMPORTANT: A 72 hour report notification must be hand delivered or mailed to DAQ within 72 hours of the initial 24 hour notification.

The following information must be included in boxes 1 through 7 on the form, pursuant to Sections 25.6.3(a)-(h) of the Clark County Air Quality Regulations.

1. Provide the identity of each stack or other emission point where the excess emissions occurred; in addition, the identity of the equipment from which the excess emissions emanated.
2. Provide the time and duration, or expected duration, of the excess emissions.
3. Provide the type of pollutant(s), the magnitude of the excess emissions (expressed in the units of the applicable emission limitation), and the operating data and calculations used in determining the magnitude of the excess emissions.
4. Provide the nature and cause of the emissions.
5. Provide the steps taken, if the excess emissions were the result of a malfunction, to remedy the malfunction and the steps taken or planned to prevent the recurrence of the malfunctions; in addition, the steps that were or are being taken to limit the excess emissions.
6. Provide a list of the steps taken to comply with the permit procedures, if the source's permit contains procedures governing source operation during periods of startup or malfunction and the excess emissions resulted from startup or malfunction.
7. Print the name and title of the Responsible Official (RO) and sign and date the Certification Statement, otherwise the report will not be accepted.
