5. Receive a report from Las Vegas Valley Water District regarding the status of the water system. (For discussion only)

Report by Kathy Flannagan & Aaron Gamble.

Water Usage: Water use for June 2026 was 4.41 MG compared to 6.47 MG in June 2025. That's a reduction of about 2.06 MG. Last year NDOT had an active project that is largely the reason for the decrease in usage this year.

We had a main break the first week of June. Repairs were completed the same day, and the line was returned to service in less than 3.5 hours from the time it was reported.

Customer Care staff are continuing to reach out to customers about potential on-site leaks, and our Rural System Operators are also keeping an eye out for anything that could indicate a leak on residents' properties and in the system. We are seeing more properties on our leak report since temperatures have risen. If you are receiving calls/texts, please don't ignore them. If you have a swamp cooler take a moment to inspect your cooler. Typical water usage when temperatures are at 100-110 can range from 4-15 gals/hr. The starting threshold for our automated notification system is 10gal/hr. If you don't have a swamp cooler and get one of these calls/texts, please inspect your interior plumbing and irrigation systems. Toilet flappers tend to be a very common source of leaks inside homes.

6. Receive a report from Southern Clark County Coordinator with UNR Extension regarding the status of programs and upcoming activities. (For discussion only)
