VACCINATIONS

Flu season typically begins in October and the Southern Nevada Health District and the Centers for Disease Control and Prevention recommend annual flu vaccine for people age 6 months and older. Once vaccinated, it takes about two weeks to develop protection from the vaccine. Flu can be a serious illness for people who are at higher risk for complications, such as young children, people with chronic medical conditions, and older adults. A flu shot is the best protection against flu and its complications. Vaccine will be available at pharmacies, clinics, and the Southern Nevada Health District.

For individuals 50 and over, there is a second booster shot available.

Additionally, adults in Clark County now have another COVID-19 vaccine available to them at Southern Nevada Health District clinics. Novavax, which has been used worldwide, is currently available at the Health District's COVID-19 clinic at 280 S. Decatur Blvd. For more information about Novavax, visit www.cdc.gov/coronavirus/2019-ncov/vaccines/novavax.html

The monkeypox vaccine is now available at the Health District. At this time, the vaccine is only administered to high risk individuals by appointment only. To schedule an appointment, visit <https://vax4nv.nv.gov/patient/s/>

For more information about monkeypox, visit <https://www.southernnevadahealthdistrict.org/Health-Topics/monkeypox/>
