2023 NEVADA TROPHY FISH PROGRAM

Welcome to the 55th edition of the Nevada Department of Wildlife's Trophy Fish Book, a product of the Trophy Fish Program which was initiated in 1968 to recognize the talents, or luck, of anglers for catching notable-sized fish from many of the over 800 waterbodies throughout the state. This program recognizes anglers for catching "trophy" sized fish in any of the 30 different fish species, each having a designated minimum weight for entry.

Congratulations go out to the 27 anglers that entered 79 fish into the Trophy Fish Program in 2023. It is not common to catch a fish that meets the minimum weight requirement of a trophy fish, and in 2023, 67 of the fish entered met the minimum weight, including 23 Common Carp, 10 Lahontan Cutthroat Trout and 9 Rainbow Trout. The remaining 25 fish were a mix of 13 different species including Largemouth, Smallmouth, and Striped Bass, Bullhead and Channel Catfish, Sacramento and Yellow Perch, Brook, Brown, Lake, Bowcutt and Tiger Trout, and Walleye. You will also see throughout this book that 13 additional records were set at waters previously having no established records for that species of fish. So, remember, you can still enter an undersized fish as long as there is no previous record from that water, or if the weight beats the current record.

In 2023, Jason Flaten caught the new Nevada state record Yellow Perch out of Wildhorse Reservoir. This new record beat the old state record that was caught out of Dufurrena Pond in 1987 by one ounce! Ironically, the state record holder for that Yellow Perch that stood for 36 years was Warren Todd Goodale who, as of 2023, now holds the water record for Walleye in Chimney Reservoir. The table below portrays all the new water records for catches that met the minimum weight qualifications at several waters throughout the State.

In 2023, two anglers completed the Native Fish Slam, making Brian Harris and Bill Reid the 30th and 31st anglers to complete the challenge since the program started in 2012. The Slam consists of catching and entering the six native sport fish found in Nevada – Lahontan, Bonneville, and Yellowstone Cutthroat Trout, Redband Trout, Bull Trout, and Mountain Whitefish. There are still about 144 other anglers currently working to complete the slam and, of course, there is no time limit, so take your time and enjoy exploring Nevada's backcountry in pursuit of its native trout!

The following pages describe current and historical trophy fish catches from Nevada's waters. We hope the great success that anglers found last year will inspire you to head out and enjoy the great fishing Nevada has to offer.

NOTE: These records are officially recognized by the Nevada Department of Wildlife as state records established from the year 1968, the first year of the Nevada Trophy Fish Program through December 2023. These records include fish taken in interstate waters including Lake Tahoe, Topaz Lake, Lake Mead, Lake Mohave and the Colorado River. It is recognized that some species of fish of larger size have been caught from Nevada waters prior to 1968.

World Record data was obtained from the International Game Fish Association's World Record Game Fishes 2023 edition.

***NOTE:** The recognized world record Cutthroat trout of 41 pounds was caught from Pyramid Lake in 1925.
