

Preparing Artwork for Exhibition

at the Government Center Rotunda Gallery

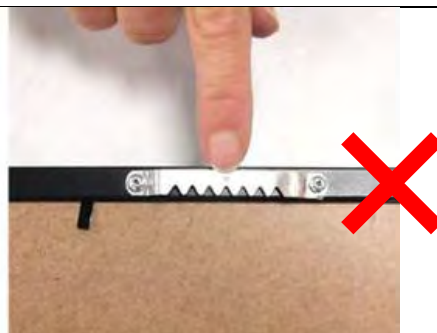

Clark County Public Art Gallery Programs

At the Clark County Government Center Rotunda Gallery, we use a grid wall system to display 2D artwork, and pedestals with vitrines for 3D artwork. Canvases may be framed or unframed but works on paper must be framed.

Any common hanging hardware may be used on canvas or framed artworks. The hardware must be exactly in the center of the frame, or on both sides at the same height. Using a wire between two hardware points is optional, but not necessary.

We use zip ties to secure the artwork to the grid walls, so we advise against putting hardware at the very top of the frame, where you would see the zip tie loop around it.

Always be sure your hardware can support the weight of the entire artwork. For additional questions, please email CCPublicArt@ClarkCountyNV.gov
