togetherforbetter

Connecting Communities. Empowering Every Resident.

Clark County Broadband is working to ensure that all households have access to reliable and affordable digital devices, high-speed internet service, and the digital skills necessary for a high-tech economy. Staying connected shouldn't be difficult or expensive. We believe no one should get left behind in this digital age.

HERE ARE SOME WAYS WE CAN HELP

Get a Device

Find free or low-cost computers from local and national organizations, as well as devices that you can use at or borrow from your local library

Get Connected

Find companies in your area that offer low-cost internet service and learn about Lifeline, which can help lower your monthly cost

Get The Skills You Need

Connect with organizations that can provide you with digital skills training for upskilling, re-skilling and cross-skilling

If you do not have access to a computer or internet service at home, and you are participating in a government-based assistance program, you may qualify for a free or low-cost computer and low-cost internet service.

There are many local libraries and nonprofits that provide free access to computers with high-speed internet access. Some libraries even offer tablets that you can borrow for a week. Several local libraries and nonprofits even offer digital skills training programs.

Look on the flip side of this flyer for helpful resources, or scan the QR code below for more details on our website.

LOCAL LIBRARIES

Clark County has many libraries located in and around your neighborhood where you can get help with the following:

- ⌘ Reserve a computer for use at any of the local libraries
- ⌘ Check out an iPad or Chromebook for a week at a time
- ⌘ Check out a mobile Wi-Fi hotspot to get free internet access at home
- ⌘ Print, scan, copy or fax documents
- ⌘ Enroll in digital skills training classes
- ⌘ Get help with job searches through workforce programs

Call or visit any of the four (4) local library districts to learn more about the resources they offer.

Boulder City Library - (702) 293-1281

Henderson Libraries - (702) 707-2665

Las Vegas Clark County Library District - (702) 734-7323

North Las Vegas Library District - (702) 633-1070

Use a computer at any one of the libraries to see all the resources that are available to you on our website. Learn about **low-cost internet service, device access programs, digital skills training and workforce programs.**

Scan the QR Code on the reverse side, or go to <https://www.clarkcountynv.gov/>, Select "Apply for Assistance," and then select "Broadband Internet Service."

NATIONAL PROGRAMS

Several national programs offer free and low-cost computers to eligible individuals in need. Some of these programs even offer technical support and digital skills training programs. Reach out to them to see if you qualify.
